

What is Data Solutions?

- Refers to a broad range of services, tools, and methodologies designed to handle, process, analyse, and derive insights from data.
- These solutions are critical for businesses and organisations to make data-driven decisions, enhance efficiency, and achieve strategic goals.
- In AWL we include Programming, Data Science, Business Analytics and Scanning in our Data Solutions Team.

Why Work with Allan Webb?

- Efficient/Cost effective requirements elicitation, analysis, product strategy and roadmap creation using our team of business analysts.
- Informed decisions for our clients on complex data from data preprocessing to advanced modelling using our data science team.
- Lean software development, in particular secure Open Web Application Security Project penetration tested web-based applications written on the Microsoft stack of technologies by our programming team
- Secure Systems (RLI Hosted Applications, ModNet Access) and security cleared Expertise

Benefits

Data Integrity

Ensure data **accuracy** and **security** through rigorous data cleaning, validation, and enrichment, maintaining the highest standards of data integrity.

Data-Driven Decision Making

Utilise **efficient** requirements elicitation, process **optimisation**, and strategic product roadmapping to **enhance decision-making** and **drive successful outcomes**.

AI & Advanced Analytics

Leverage predictive modelling and machine learning to **uncover patterns**, **predict trends**, and **make informed decisions** based on complex data.

Lean Software Development

Implement **secure**, **scalable**, and **reliable** software solutions through lean development practices, with a focus on creating **cutting-edge web-based applications** using the Microsoft technology stack.
